THE AUDUBON PHILOSOPHY

We believe in the wisdom of nature's design.

We know that soil, water, plants and wild creatures depend upon each other and are vital to human life.

We believe that persistent research into the intricate patterns of outdoor life will help to assure wise use of Earth's abundance.

We recognize that each living thing links to many others in the chain of nature.

We condemn no wild creature and work to assure that no living species shall be lost.

We believe that every generation should be able to experience spiritual and physical refreshment in places where primitive nature is undisturbed.

We dedicate ourselves to the task of opening the eyes of all so they may share the beauty of the outdoors.

IF YOU DO NOT NOW BELONG.....

.we invite you to join the 400,000 Audubon members in more than 400 chapters in the United States and abroad who, through their memberships, have made their commitment to environmental health and quality.
